

BiSafe Systems_{L.L.C.}

RETAIL CATALOG

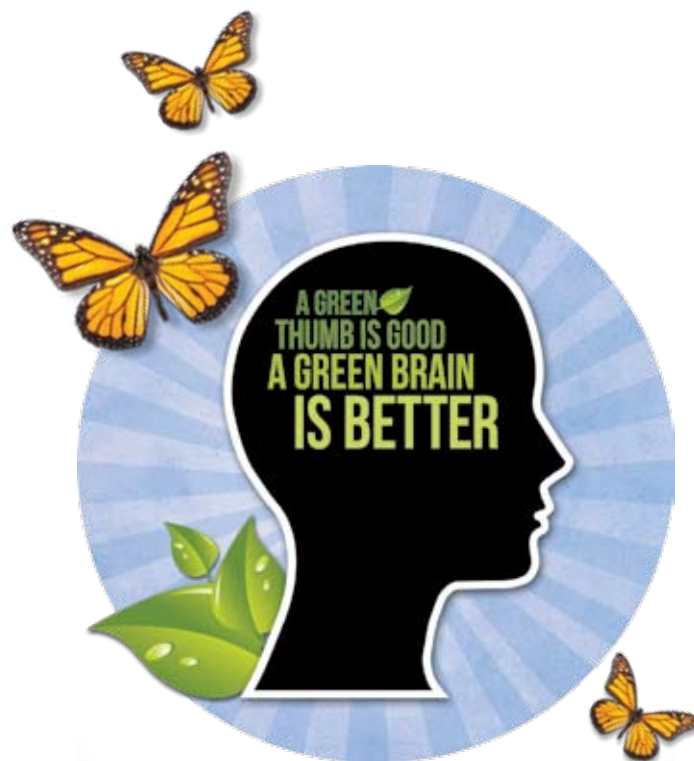

BioSafe Systems^{L.L.C.}

BioSafe Systems is a family owned business that develops unique, green, and sustainable products for a variety of industries and applications. All of our products have to meet our own expectations of effectiveness, sustainability, and environmental stewardship.

We have pioneered the use of activated peroxides in controlling plant and human pathogens in agriculture, horticulture, and sanitation. Now, we are leading the way to bring these same solutions to the retail market. We provide products to eliminate disease on all types of growing plants, to treat algae without the use of chlorinated products, and to control insects using botanical extracts.

Our retail line of home and garden products utilizes the same unique and effective formulations that are being used in commercial applications. The majority of our products meet the requirements of the National Organic Program Standards, which is the ultimate test of sustainability.

Feel good about selling our activated peroxide products. They are an easy choice to the eco-conscious customer.

ALGAE CONTROL & PREVENTION

A crucial element of pond care is algae control. Quickly eliminate algae and keep it gone with GreenClean algaecides. All of our algaecides can be used in waters containing aquatic life and leave no residual behind. With curative and maintenance algaecide treatments, the GreenClean line is an easy and reliable way to care for water features.

WATER GARDENING SOLUTIONS

Eco-Friendly

GreenClean algaecides and water maintenance products are made with ingredients that biodegrade naturally. Our products are non-toxic and non-harmful for children, pets, and the environment. We take pride in creating products that don't leave residues behind.

Affordable and EPA Approved

Our products have better coverage, quicker results, and most are registered with the US EPA (United States Environmental Protection Agency). Our prices are in line with non-registered products that can't claim to be actual algaecides.

WE HAVE ANSWERS.

Keeping water healthy and clean doesn't have to be complicated. Use this chart to help choose the right product for every situation.

	GreenClean Granular Algaecide	GreenCleanFX Liquid Algaecide	GreenClean Tablets	GreenClean XTREME Liquid Bacteria	GreenClean pH UP and pH DOWN	GreenClean Blue Colorant

Keeping Water Balanced				✓	✓	

The GreenClean water gardening line is designed to work effectively without complicated directions.

GreenClean® Granular Algaecide

GreenClean Granular Algaecide For Water Gardens and Koi Ponds

GreenClean Granular works through oxidation, breaking down algae cells on contact. Its organic chemistry immediately begins fighting algae blooms, releasing vital oxygen into the water body as it biodegrades. GreenClean Granular is ideal for algae growing on waterfalls and all types of water.

- Controls String Algae in Ponds and on Waterfalls
- Breaks Down into Water & Oxygen
- Can be Used All Season as a Preventative Treatment
- Works on Contact
- Eco-Friendly Chemistry & OMRI Listed

Container Size	Treats Up To
1/2 lb.	1,000 gallons
1 lb.	2,000 gallons
2 lb. w/ bonus 1/2 lb.	5,000 gallons
8 lb.	16,000 gallons

Also available in 20 and 50 lb. pails.

ECO-FRIENDLY & PROVEN EFFECTIVE

All of our algaecides are EPA registered and are alternatives to harsh chemistries such as copper sulfate. GreenClean Granular is also listed with the Organic Materials Review Institute (OMRI).

KEEPING THE BALANCE

A healthy pond is a beautiful pond. Regular use of beneficial bacteria, colorants, and pH adjusters helps maintain a thriving pond ecosystem. It is essential to keep water balanced to promote healthy fish and plants as well as clear water. Avoid decaying organic debris, high nutrient levels, or even disturbing odors by using the complete GreenClean line. All our products have no harmful residues and are non-toxic to people, pets, aquatic life, and wildlife.

GreenClean®FX Liquid Algaecide

GreenCleanFX Liquid Algaecide

For Water Gardens and Koi Ponds

GreenCleanFX Liquid Algaecide is a commercial strength liquid algaecide for treatment and control of algae. With low application rates, GreenCleanFX is a highly effective and affordable solution. It's great for ponds, pondless waterfalls, and fountains.

- Eliminates Green Water Algae
- Sinks to Bottom – Perfect for Deeper Waters
- Does Not Affect pH Levels
- Continues to Work Up to 48 Hours After Application

Container Size	Treats Up To
16 fl. oz. w/ bonus oz.	5,100 gallons
32 fl. oz. w/ bonus oz.	9,900 gallons
128 fl. oz. (1 gallon)	38,400 gallons

TIP: Apply to area with greatest water flow to ensure rapid movement and adequate mixing.

GreenClean® Tablets

GreenClean Tablets

For Water Gardens and Koi Ponds

GreenClean Tablets utilize activated peroxygen chemistry, the same chemistry as GreenClean Granular Algaecide, in convenient tablet form. GreenClean Tablets are ideal as part of a preventative algae maintenance program.

- Ideal for Preventing Algae All Season
- Alternative to Copper Chemicals
- Easy Application
- One Scoop Treats 100 Gallons of Water

Container Size	Treats Up To
3 lb.	6,800 gallons
8 lb.	18,300 gallons

TIP: Tablets work best when applied biweekly. When applying, distribute evenly throughout the pond.

Determining Water Volume:
 Length(ft) x Width(ft) x
 Depth(ft) x 7.5 = Gallons

GreenClean® XTREME Liquid Bacteria

GreenClean XTREME Liquid Bacteria

For Water Gardens and Koi Ponds

GreenClean XTREME Liquid Bacteria is comprised of 68 powerful strains of beneficial bacteria. This unique product is designed to bring pond water back into balance while helping fish and aquatic life flourish in a healthy environment. Using GreenClean XTREME Liquid Bacteria greatly reduces the need for water changes.

- Ideal for New Ponds and Ponds with Aquatic Life
- Odor-Free (Unlike Other Products)
- Can be Used All Season
- Reduces Ammonia, Nitrates, Fish Waste, and Debris
- Eliminates Cloudy Waters and Odors

Container Size	Treats Up To
16 fl. oz. w/ bonus oz.	17,000 gallons
32 fl. oz. w/ bonus oz.	33,000 gallons
128 fl. oz. (1 gallon)	128,000 gallons

GreenClean® Blue Colorant

GreenClean Blue Colorant

For Water Gardens and Koi Ponds

GreenClean Blue Colorant increases water quality and enhances water clarity. It enhances the water's appearance with a natural blue tint. This colorant is food grade, so it can be safely used with no use restrictions and won't harm aquatic life.

- Non-Staining to Aquatic Life
- Built-in Dosing Cup for Easy Application
- Adds a Pleasing Blue Tint to Water

Container Size	Treats Up To
16 fl. oz. w/ bonus oz.	17,000 gallons

TIP: Add slowly until desired color is reached. May need to re-apply after rainfall, run-off, or evaporation.

KEEPING THE BALANCE

A healthy pond is a beautiful pond. Regular use of beneficial bacteria, colorants, and pH adjusters helps maintain a thriving pond ecosystem. It is essential to keep water balanced to promote healthy fish and plants as well as clear water. Avoid decaying organic debris, high nutrient levels, or even disturbing odors by using the complete GreenClean line. All our products have no harmful residues and are non-toxic to people, pets, aquatic life, and wildlife.

GreenClean® pH UP & pH DOWN

GreenClean pH UP and pH DOWN

For Water Gardens and Koi Ponds

Keeping pH level in a neutral range is essential for the health of aquatic life, plants, and the pond ecosystem. An unbalanced pH level suppresses the proper amount of nutrients aquatic plants need to thrive and is a major cause of fish stress and disease. GreenClean pH UP and GreenClean pH DOWN slowly raise or lower the pH of pond water, making it more alkaline or acidic.

- Can be Used Daily to Keep Water Balanced
- Encourages Healthier Aquatic Life and Plant Growth
- Will Not Promote Algae Growth
- Safe for Fish and Delicate Aquatic Plants

Container Size	Treats Up To
1 lb.	8,000 gallons

TIP: Adjust pH levels no more than 0.2 points within a 24-hour period. Routine, early morning water testing is recommended.

LONG LASTING WITH BETTER COVERAGE

Gallon to gallon, the GreenClean line treats more than other products on the market. This means less plastic to recycle and a better value for your customers.

Here's What People are Saying:

"We have a koi pond in direct sun with continuous algae problems. GreenClean Granular is by far the best algae control I have been able to find."

"I've noticed a huge difference in my water's clarity since using GreenClean Tablets and XTREME Bacteria."

"I like a company that takes the time to talk with their customers."
